

Defense Innovation Board
Spring 2024 Public Meeting – Public Comments
April 17, 2024

- **Feedback/Inquiries on Previous Studies**

1. How can we assure our ports are protected from outside interference. We saw what a vessel plowing into a bridge can cause in terms of supply interference – Martin Tuchman, CEO, The Bank of Princeton

- **New Study Topic Suggestions**

None

- **DIB Procedure Inquiries**

None

- **Other Comments**

1. Dear Members of the Defense Innovation Board, I hope that you and yours are all doing well. Within the DoD, we hire smart people to develop software, but these intelligent people are not developing smart software engineering strategies. We need to stop allowing software engineering leaders and developers to program code for job security; it is compromising national security, operations are going down, and warfighter lives are gravely at risk. – Elihu Eli El
